

I-REC STANDARD
CONFERENCE 2022

Standardizing
Global Attribute
Markets

1-2
NOVEMBER
2022

BANGKOK

POST EVENT
REPORT

BRIEF SUMMARY

The I-REC Standard Foundation's inaugural conference took place in Bangkok, Thailand on 1 and 2 November 2022 with over 300 delegates attending from 45 different countries. Prior to the conference, on Monday, 31 October, some 220+ individuals turned up for the three pre-conference sessions.

The I-REC Standard Conference (ISC) 2022, titled "Standardizing Global Attribute Markets," started on Tuesday 1 November with the introductory, keynote session. The ISC 2022 offered an engrossing program with 40+ knowledgeable, industry-leading speakers. The speakers shared their experience and views on the latest attribute tracking market information and practices around the world including developments with the I-REC for electricity, as well as new and upcoming products, changing government policies, and industry perspectives.

The ISC 2022 closed Wednesday afternoon, 2 November, with an announcement for the next I-REC Standard Conference to take place in 2023. We look back on a very successful first conference, reinforced by the positive responses we received during and after the conference..

- CDP

WHAT OUR PARTICIPANTS SAY ABOUT ISC 2022

"A diverse, collegial space to discuss and debate timely issues so that we can together more effectively scale global investments in decarbonizing the energy system."

"The I-REC conference was interesting and I learned many new things."

"A great event that gathered most of the key players of the I-REC market in one place."

"This was one of the best conferences I've ever attended: nice venue, the right number of attendees and diversity of perspectives/industry roles, timely and engaging content, sufficient networking time, worthwhile (and fun!) evening events, etc."

SELECTION OF IMAGES FROM THE CONFERENCE

"A relevant, timely, and substantive-filled conference on the future of certified energy flows around the world."
