The International Tracking Standard Foundation

Founder of I-REC

The I-TRACK Foundation Newsletter

The second and third quarters of 2026 have been another busy and productive period for the I-TRACK Foundation, with several important milestones achieved across our global network. These developments continue to strengthen the International Attribute Tracking Standard while supporting the growth and integrity of environmental attribute markets worldwide.

From the release of the new I-TRACK Product Code for Biogas and Biomethane and the expansion into new issuing countries to the completion of Quality Assurance Assessments and participation in international industry events, we are pleased to share the latest news and updates with our community.

Please feel free to contact us for specific questions. We remain available through **secretariat@trackingstandard.org.** Follow the I-TRACK Foundation on **LinkedIn** for updates and links to news items. To receive future newsletters in your mailbox, subscribe via this **form**.

The early bird registration rate for the ISC2027 closes on 1 September

The Early Bird registration deadline for the I-REC Standard Conference (ISC2027) is fast approaching. **Register before 12:00 CEST on 1 September 2026** to take advantage of discounted rates for the I-TRACK Foundation's flagship event, to be held on 26–27 January 2027 in Istanbul, Türkiye.

Held under the theme "Standardizing Global Attribute Markets," ISC2027 will bring together policymakers, corporate buyers, registry operators, standard-setters, and other stakeholders from across the global attribute tracking community. The conference will explore regulatory developments, market design challenges, and opportunities for greater international coordination, providing a key platform for dialogue at an important stage in the evolution of attribute tracking systems.

In addition to registration, a range of sponsorship packages are available for organisations looking to engage with an international audience of market leaders and decision-makers. Sponsorship offers an excellent opportunity to showcase your organisation, strengthen brand visibility, and contribute to shaping the future of global attribute tracking markets.

To learn more about sponsorship opportunities, please contact **events@trackingstandard.org**.

I-TRACK Code for Biogas and Biomethane released

The I-TRACK Foundation, alongside GGT and Xpasniv, announced in May the release of the I-TRACK Product Code for Biogas and Biomethane (I-TRACK(G) Code).

The I-TRACK(G) Code establishes the framework for issuing and managing certificates for renewable gaseous fuels under the International Attribute Tracking Standard, supporting the growing global market for biogas and biomethane.

Alongside the release of the I-TRACK(G) Code:

- **Global Gas Tracking (GGT)** has been Accredited as the Code Manager.
- **Instituto Totum** has been Accredited as the Registry Operator and local Issuer for Brazil
- **Evident** (an **Xpansiv** company) has been Accredited as the Registry Operator for all countries outside of Brazil
- **Green Certificate Company (GCC)** will act as Issuer for all other approved jurisdictions until local Issuers are appointed.

Learn more about the I-TRACK(G) Code here.

Newly approved I-TRACK(G) issuing countries

The I-TRACK Foundation has approved the first countries for issuing under the I-TRACK(G) Code certificates for renewable biogas and biomethane (I-TRACK(G)):

- **Brazil**
- **Malaysia**

These approvals represent an important milestone in expanding the application of the International Attribute Tracking Standard beyond renewable electricity.

Newly approved countries for I-REC(E) issuance

The I-TRACK Foundation is pleased to announce that the following countries have been approved for the issuance of I-REC(E) and I-TRACK(E). These developments expand the reach of reliable, internationally recognised renewable energy certification into a key and growing market.

- **Côte d'Ivoire**
- **Saint Lucia**

Minor changes in the I-REC(E) market statistics

The I-TRACK Foundation has approved a request from Evident, an Xpansiv company and the Registry Operator for I-REC(E), to change how I-REC(E) statistics are presented in the monthly overview.

Read more about this development here.
Download the I-REC(E) market statistics from July 2026

Quality Assurance Reviews

The I-TRACK Foundation has completed Quality Assurance Assessments for:

- **Instituto Totum**
- **AENOR**
- **Transpower**

These assessments form part of the I-TRACK Foundation's ongoing commitment to ensuring that all Issuers continue to operate in accordance with the International Attribute Tracking Standard and the relevant Product Codes.

Brazil's ANP recognizes I-REC(E) for use in RenovaBio

The I-TRACK Foundation was pleased to be referenced in relation to Thailand's first UGT, highlighting the growing recognition of robust international attribute tracking frameworks in emerging renewable energy markets.

The I-TRACK Foundation looks forward to supporting continued market development across the region.
